

2011 Compartment Planning and Information Sharing Summary CCF_K3V

The following is a strategic planning and information sharing initiative. This document refers to the geographic area as a planning COMPARTMENT. These Compartments are the basis of a 4 year planning window to construct and or remediate road and trail access, remove timber and apply intermediate silviculture treatments. Information is formulated early through estimates and initial concepts proposed for stakeholder discussion purposes. Monitoring efforts will be based on the final prescriptions and logging plans as this Summary may not be updated after its initial publication.

Name: RAINBOW02				Permit Duration: March 2011-2014		
Location: Cal-Cheak -Sugar Cube area south of function junction						
Compartment Summary: a mix of plantation forests from 1960s. Includes Cal-Cheak Campsite mature forest reserves. Access remains to highway from Daisy and Callaghan FSR						
Objectives:						
<ol style="list-style-type: none"> 1. Manage previous retention logging to increase understory regeneration performance. 2. Provide a small economic harvesting opportunity in area previously developed. 3. Identify other opportunities for stand management projects in 30-50 year old plantations. 						
Status: Initial layout complete Cutting Permit March 2011						
Treatment Unit	Activity	Season	Year	Area	M3	Silviculture Summary
A	Logging	Spring	2011	5.5	185	Moderate Variable Retention 60-80TPH
Clearings	Refor	Tbd	Tbd			
Heli Ldg	Burn	Tbd	Tbd			Slash pile remains on landing
Compartment Considerations						
Visual (design and vantage points)			Immediate foreground considered when viewed by highway			
Rare Forest Ecosystems (old seral)			None outside of Riparian Recreation Reserve, areas of Unique Forest Ms1 02 on Lava Flows occur, much already harvested.			
Recreation (com. or public)			Access road is used as a loop connector to Cal-Cheak Campsite. Abandoned CRA staging area could be rehabilitated STS trail within Rip. Rec Corridor			
Water (wetland, stream, river)			Small ponds or large streams no surface water issues.			
First Nation (Cult Heritage Res)			Reviewed with no comments or requests
